run run_20261107_182914_fa8e threshold 0.55 scenarios 10
date 2026-11-07T18:29:14+05:30

Headline

scam caught	7/7
genuine passed	3/3
caution count	0
errors	0
weakest scenario	family_emergency (composite 75, distance 0)

Hard cases

sc08_college_exam_fee [genuine mentioning money] expected genuine composite 0 band low -> passed
sc10_bank_refund_no_urgency [scam without urgency words] expected scam composite 71 band high -> caught

Per-scenario results

#	scenario	expected	comp	band	verdict	dist	case
1	sc01_family_emergency	scam	75	high	caught	0	
2	sc02_bank_fraud	scam	74	high	caught	0	
3	sc03_executive	scam	75	high	caught	0	
4	sc04_government_police	scam	76	high	caught	0	
5	sc05_tech_support	scam	74	high	caught	0	
6	sc06_prize_refund	scam	76	high	caught	0	
7	sc07_friend_dinner	genuine	0	low	passed	0	
8	sc08_college_exam_fee	genuine	0	low	passed	0	genuine mentioning money
9	sc09_relative_checkin	genuine	0	low	passed	0	
10	sc10_bank_refund_no_urgency	scam	71	high	caught	0	scam without urgency words

Threshold sweep (stored Layer 2 risk, recomputed Layer 1)

threshold	scam caught	genuine passed	caution	errors
0.45	7/7	3/3	0	0
0.50	7/7	3/3	0	0
0.55	7/7	3/3	0	0
0.60	7/7	3/3	0	0
0.65	7/7	3/3	0	0

Calibration against builder-written scripts, not independent accuracy.

Devanagari: Nirmala UI (C:\Windows\Fonts\Nirmala.ttc) is installed on this machine, but this scorecard prints no Devanagari transcript excerpts - its tables carry scenario ids, bands, verdicts and Latin matched phrases only. latinize() remains a safety net, so a stray Devanagari run is replaced rather than dropped.
